B. G. S. T.

Enjoyable Evening.

The chapel at the Graded School was fairly well filled Thursday evening to hear the dialect reading by Miss Barbe, of Danville. Miss Barbe's work was of a high order that the audience appreciated, and she was complimented by all. The singing by Mrs. Juliet Rogers was a feature of the entertainment greatly enjoyed and appreciated by all present. Several members of the Lancaster orchestra made good music.

Another Enterprise.

Mr. Jas. I. White, a large stone contractor, of Mt. Vernon, has located a stone yard in Lancaster which he supplies from his quarries in the mountains. He has received several carloads of fine stone, for steps, cistern tops, door and window sills, bases for tombstones, etc. All fully guaranteed. Mr. White is a leading business man of his section of the state and comes highly recommended as a citizen. His yard is located near the depot.

Important Meeting.

As several matters of great interest to the town and county should be looked after, it has been decided to re-organize the Commercial Club, and a meeting will be held in the Police Court room Monday night at 7:30 o'clock for that purpose. The only way to push a town's interests is by a thorough organization of her business men, with conservative and hustling citizens in the lead. We have many such men in Lancaster, who will put their shoulder to the wheel, push and not get discouraged at the whims of a few drawbacks who look upon the dark side of every improvement proposed. Every business man of the town is wanted in the club, and it is hoped all will be on hand Monday night promptly and show by their presence that they are for Lancaster's interest and not wholly for self.

Teachers Chosen.

At the meeting of Graded School Trustees held last Saturday, the entire corps of teachers were reappointed, with the exception of Prof. Hampton, who had requested a raise in his salary. The trustees were unable to grant the request and the place will be filled within the next few days. Judge M. D. Hughes is an applicant for the place, and has strong endorsements. The teachers re-appointed are Prof. J. H. Patterson, principal, Misses Knapp West, Jeanie Shumate, Annie Royston, Miss Peters and Miss Margaret Murphy. Mrs. Belle Burnside was also re-appointed teacher of music. It would be impossible to find a more competent corps of teachers or ones who would take more interest in the school. They are untiring in their work, and give it their undivided attention.

Closing of Graded School.

The Lancaster Graded School closed its most successful session this week. There were six graduates, whose names appear elsewhere in this issue. The school has been conducted to the satisfaction of both patrons and scholars, and there has been no trouble at all in any of the branches. Of course some may have a kick coming, but there is always to be found people who are not satisfied with anything or anybody, but taking it all in all, the school has proven the most successful in its history. There were an average of 300 pupils during the term, the health of whom was remarkably good, it never becoming necessary to lose a day on account of illness among the youngsters. The Record congratulates the corps of teachers and trustees upon the able management of this, the best institution in the county.

CENTRAL RECORD.

— An Independent, Local Newspaper. —
ISSUED WEEKLY.

LOUIS LANDRAM, Editor and Publisher.

Lancaster, Ky. May 23, 1901.

THE report of a committee to the Southern Presbyterian General Assembly at Little Rock, Ark., emphasized the difficulty, if not the impossibility, of influencing the masses to maintain a decent respect for the Lord's Day as long as the Government requires its army of employees to work on the Sabbath, and the different States allow the running of both freight and passenger cars and secular newspapers are allowed to pursue their avocation as on other days, publishing and selling their papers for gain. The desecration of the Sabbath becomes more general every year, and, at the present rate, it will not be long before the little handful of God-fearing people who assemble in churches will be the only ones who make any effort to keep the day holy. Many men who close their places of business and put on long-tail coats only do so because the law requires a suspension of business, and if there were no such laws, they would be open at the old stand the same as on week days. This is truly a distressing state of affairs.

ANDREW CARNEGIE gave \$10,000,000 to establish free education in four Scotch universities. It is so seldom that rich men part with their cash for something other than that which will bring ten-fold returns, that actions like Mr. Carnegie's furnish news items of the rarest quality.

THE breaking of the dam and consequent loss of sixty-five million gallons of water at Pike's Peak reservoir may cause trouble out there, but it will cut no ice in the Kentucky editors' visit to that place. All they want is water enough to keep the engine in steam.

THE latest combine to be formed is a fire-works trust. The only concern of this kind that will not go into the trust is the one unquenchable fire-works that will finally absorb all trusts.

"OUGHT women ride astride?" is a glaring headline in an exchange. We see no reason why they should not, if they have such inclination. The men would raise no kick.

THE customs authorities have prohibited the entry of typewriters into Turkey. We presume the jealous wives of the officials made them issue this order.

A Gentle Hint.
In our style of climate, with its sudden changes of temperature, rain, wind and sunshine often intermingled in a single day, it is no wonder that our children, friends and relatives are so frequently taken from us by neglected colds, half the deaths resulting directly from this cause. A bottle of Boschee's German Syrup kept about your home for immediate use will prevent serious sickness, a large doctor's bill, and perhaps death, by the use of three or four doses. For curing Consumption, Hemorrhages, Pneumonia, Severe Coughs, Croup, or any other disease of the Throat or Lungs, its success is simply wonderful, as your druggist will tell you. Get a sample bottle free at Storms Drug Store. Regular size 75c. Get Green's Prize Almanac. July-18.

On the 20th inst., Charlie, the six-year old son of Walker Baker and wife, was kicked in the head by the old family mare. Fortunately, however, the wound inflicted, while an ugly one, proved not to be very serious, for which the parents were, of course very thankful.

At two o'clock on the 25th inst., will be held a meeting at Wallacetown to organize for the construction of the mile of new pike for which the Madison Fiscal Court has just appropriated \$1,200. The pike will extend from Wallacetown on beyond the Baptist and Methodist churches and almost to the Christian church.

The rain which fell Saturday was very beneficial to our farmers, but especially so to Grider Wallace, as it enabled him to work up his cloids with such modern implements as the harrow and drag instead of pounding them to pieces with ax and sledge as he was doing on the day before the rain. But, oh! that big rain that followed later!

J. C. Fox sold 40 acres of land to D. W. Faulkner for \$400.

Cut worms are playing havoc with hemp in this locality.

Mrs. Mary E. Fain is having a temporary residence built, preparatory to a handsome cottage later.

Uncle William Murphy, a veteran resident of this country, while away from home last Friday afternoon, lost by fire, his house and contents. Everyone extends sympathy. He is an old man and lived alone.

A gentleman, while fishing in Kentucky river recently, hooked a three and one-half pounder, but failed to land it, so he said some one asked how he knew that it weighed pounds above stated, he said the scales on his back were balanced at three and a half pounds.

Rain in this, and adjoining localities last Saturday afternoon, did much damage to plowed land on the hill side, near the mouth of Sugar Creek. In Jessamine county, Mr. B. E. Covington's plowed hill land was overflowed and carried into nearby ravines and thence in Kentucky river.

John Bogie has returned from a protracted visit to relatives and a friend in Madison county. Mr. Ed Simpson and Steve Hill, two of our handsomest young men, went to Danville Monday on a business trip. While there Ed purchased an elegant buggy. Ye girls begin to smile at him and see which will get the first drive.

If people only knew what we know about Kodol Dyspepsia Cure, it would be used in nearly every household, as there are few people who do not suffer from a feeling of fullness after eating, belching, flatulence, sour stomach or water-brash, caused by indigestion or dyspepsia. A preparation, such as Kodol Dyspepsia Cure, which, with no aid from the stomach, will digest your food, certainly can't help but do you good. F. P. Frisbie.

"It is with a good deal of pleasure and satisfaction that I recommend Chamberlain's Colic, Cholera and Diarrhoea Remedy," says Druggist A. W. Sawtelle, of Hartford, Conn. "A lady customer, seeing the remedy exposed for sale on my show case, said to me: 'I really believe that medicine saved my life the past summer while at the sea shore,' and she became so enthusiastic over its merits that I at once made up my mind to recommend it in the future. Recently a gentleman came into my store so overcome with colic pains that he sank at once on the floor. I gave him a dose of this remedy which helped him. Poison Oak
Poison Ivy

are among the best known of the many dangerous wild plants and shrubs. To touch or handle them quickly produces swelling and inflammation with intense itching and burning of the skin. The eruption soon disappears, the sufferer hopes forever; but almost as soon as the little blisters and pustules appear the poison has reached the blood, and will break out at regular intervals and each time in a more aggravated form. This poison will linger in the system for years, and every atom of it must be forced out of the blood before you can expect a perfect, permanent cure.

SSS Nature's Antidote
FOR
Nature's Poisons,

is the only cure for Poison Oak, Poison Ivy, and all noxious plants. It is composed exclusively of roots and herbs. Now is the time to get the poison out of your system, as delay makes your condition worse. Don't experiment longer with salves, washes and ointments—they never cure. He took Sulphur, Arsenic and various other drugs, and applied externally numerous lotions and salves with no benefit. At times the swelling and inflammation was so severe he was almost blind. For eight years the poison would break out every season. His condition was much improved after taking one bottle of S. S. S., and a few bottles cleared his blood of the poison, and all evidences of the disease disappeared.

People are often poisoned without knowing when or how. Explain your case fully to our physicians, and they will cheerfully give such information and advice as you require, without charge, and we will send at the same time an interesting book on Blood and Skin Diseases. A Bright Side to Everything.

Blessed is the poor man. Pickpockets never bother him, and road agents give him a wide berth. The tax collector never hounds him. Nobody tries to borrow, and no one asks him to endorse. He never runs head over ears in debt, and is not robbed or harassed by litigation. Burglars never invade his premises, and he sleeps in peace. When he dies nobody questions his will or attempts to confiscate his bones. Blessed, therefore, are the poor in pocket, for they always get their money's worth.—Ex.

Can't You Learn How?

It seems that some people will never catch on to the use of a telephone. This week we had occasion to see some of the many annoyances caused at the exchange by the failure of users of phones to ring off after finishing their conversation. Some lumberheads would call, ask for a connection and leave the operator to guess when they were through. More than half the trouble at the exchange is caused by this carelessness, or more properly speaking, ignorance. If you can't learn to use a phone, hire a boy to show you how or to do your talking for you.

Dedication of Colored Church.

Rev. Archie Pettiford requests THE RECORD to say that the colored Christian church in the "Middlesboro" addition will be dedicated next Sunday morning at 11 o'clock and all the white people are invited to come. Rev. Pettiford has worked hard to build this church and is entitled to much credit for his labor. It was he who cut the trees, hauled them to the saw mill and then to Lancaster to have the lumber dressed for the pews. The church is named "Stone's Chapel," in honor of Mr. R. A. Stone, our bustling merchant who made the first large subscription.

Four Generations.
Living in one house, near Antioch, this county, are four people representing four generations. It is the family of Wat Adams, whose daughter, grandson and great-granddaughter live with him.

Toll Gate Erected.

Perhaps the only toll gate in central Kentucky now stands on the new Danville pike at the iron bridge. Garrard county bought all the pike on this side of the river, which is as far as our line runs, and Boyle county bought only the "old" pike, leaving the stretch between the river and Hedgeville. As Boyle has never bought the pike, and it requires money to keep it in repair, the directors were compelled to take steps and get some money out of it. They can't afford to furnish a pike for the free travel of the public. We have never heard why Boyle does not take the road.

Prohibition Candidates.

The Prohibitionists of Jessamine county met in Nicholasville Monday, at 1:30 o'clock, at the call of the county chairman, Wm. Lowen, for the purpose of putting out a county ticket for the coming November election. The following partial ticket was nominated, viz: For county Judge B. Urton; for Sheriff, O. T. Soper; for county Clerk, R. L. Cooper; for Jailor, J. M. Watts; for Assessor, J. H. Blumfield; for Representative to the Legislature, James Adams. The Prohibitionists of that county claim about 100 votes, when they can obtain a "fair count." Their highest vote in Garrard was about 100, in 1894, in the Congressional race. Their vote for Wallace in 1899 in the race for Governor was 46. It is their intention to put out a ticket in this county also.

Some Kentucky Towns.

The census shows some queer names of towns and voting precincts. For instance, Kentucky products among others the following:

Commencement Exercises.

A large audience gathered at the Opera House yesterday morning to witness the Commencement exercises of the Graded School. The program published in last issue was commenced promptly at ten o'clock. After a prayer by Eld. Allen R. Moore, the program was carried out, and the graduates and their subjects were as follows: Walter Chenault Hudson, "The Visible Power of Well Directed Energy;" Miss Bessie Guley, "Woman's Place Today;" Sim H. Anderson, "The Dawning of the Twentieth Century;" Willie B. West, "Ambition and Hope of Man;" Miss Francis Pearl Bettis, "Sleep After Toil, Port After Stormy Sea;" Louis Herndon, "The Heavens as Seen Through a Telescope." The diplomas were presented by Gov. Bradley, after which Rev. J. E. Woolford pronounced the benediction.

Help, or Get Out.

Some people seem to think that two or three live business men ought to keep pushing a town's interests, says the Winchester Democrat. Some merchants who "do not believe in advertising" think that the more enterprising fellows will spend their money for advertising and when people come to town, they will spend their money with the man who "don't believe in advertising," as well as with the man who spends his money to advertise his goods and invites the people to deal with him. But such a man is mistaken. People read advertisements more today than ever before. They read them at home and when they come to town they go direct to the merchant who advertises and invites them to trade with him. And it is right and proper that they should.

Mysterious Sunday Disease.

Of the "Mysterious Sunday Disease" a well-known sister has to say: Many people are seemingly well during the week but afflicted with all manner of ailments when Sunday comes around and on Monday they are all well again. I really dread the approach of the Lord's Day, for with the day there come to many of my flock colds, sick headache, pain in the side and nausea, while numbers complain of "that languid feeling."

Sunday before last I spent really an anxious day, for there happened to be absent from the services quite a number, for the best of reasons, of course; a rushing in the head, a touch of cramps, toothache, hardness of hearing, catarrh, torpid liver, inflammation of the membranes, lumbago and worse than all "that tired feeling." Then, what greatly distresses me, the next day was that Mrs. H. V. Blarcom had issued invitations to an "at home" for that evening, and the fear well-nigh paralyzed me that but few would respond, seeing many of her invited guests had been absent from the Sabbath services. Imagine then, if you can, my profound surprise to see on that Monday evening so wholly unexpected, so general and complete a recovery, and when I made inquiry concerning the Sabbath ailments only two were able to recall what had really been the matter with them the day before.—Ex.

Gov. McCreary Feels Confident.
A special to the Courier-Journal says Ex-Gov. James B. McCreary, of Kentucky, is in Washington on business before the Court of Claims, but is spending a great deal of his time talking about his chances for election to the United States Senate.

"I am not a Senator now," he said, at the Riggs House, while a broad smile covered his face at the mere mention of the possibility, "but I hope to be one of these days," he continued. "Primaries have been held for nominations for the State Legislature in all parts of Kentucky. Four were made last Saturday, all favorable to me. I don't want to boast, but I am very well satisfied with the outlook for myself. I have no doubt that the Legislature to be elected next fall will be Democratic on a joint ballot, and I think I will have enough to elect me."

Ten thousand harvest hands will have to be imported into Kansas and Oklahoma the coming season to save the wheat crop.

It is estimated that there are over 7,000 grain mills in Russia, grinding annually over 16,000,000 tons of grain.

Newton, Kansas, has just shipped to California a train load of eggs. There were 12 huge refrigerator cars, containing 144,000 dozen, of nearly 2,000,000 eggs.

Four new wheat warehouses at Tacoma, Wash., the last of which is nearing completion, have a storage capacity of 3,250,000 bushels.

The exports of butter from Russia for the first ten months of the calendar year 1901 are given at 37,729,220 pounds.

The 1900 wool clip of Oregon was about 18,000,000 pounds; about 1,500,000 pounds were produced in the Willamette valley, and the remainder in the eastern portion of the State.

Cutworms are doing much injury to tobacco plant beds and early corn in Woodford county. One farmer had a plant bed forty feet in length entirely destroyed by cutworms.

The farmer who sows clover with oats is pretty sure to get a satisfactory stand. A failure is rare. Plow in with a double shovel, sow the clover seed and brush or harrow lightly.

In many portions of Mississippi fifty per cent. of the cotton crop will have to be replanted, and in some sections of the State the price of seed is so high that many farmers are not able to purchase enough to make a second planting.

The farmers of Kansas will produce about one million pounds of Burley tobacco this year. Former Kentuckians are said to be interested in the cultivation of the "weed" in this State, and are hopeful of making it a profitable crop.

A small black bug, new to this section, has attacked the tobacco plants and are playing destruction with them. South of town they are particularly destructive. Some farmers are buying hemp seed to replace tobacco. —Lexington Gazette.

It is estimated that the profits from the may corn "corner" are between \$500,000 and \$700,000.

B. F. Patton and Jeff Dunn have returned from the mountains, where they bought a lot of stock. They report stock rather scarce and prices stiff.

Tobacco plantbeds in many portions of Bourbon county have been almost entirely ruined by cut worms, necessitating replanting. Some raisers have used soaked seed in the second planting with but indifferent success.

Implements should be suited to the soil and crops grown. Occasionally a tool will be found that will do good work in all soils, but this is not usually the case. To know a good tool and when it is doing good work in the field requires some intelligence.

Very few lambs are engaged and the traders appear to be in no haste about making purchases. The notice prevails that the lambs this spring are not healthy, and developments are awaited. At this time last spring nearly all the lambs in the county were engaged at good prices. —Boone County Recorder.

A man can steal from a bank, a merchant or a corporation, but he can not steal from old mother earth on the farm. The soil may be robbed in a sense by being made to grow worthless products, but the man is never benefitted thereby. A man may beat his neighbors, but he can never beat his farm. It is always and ever true that whatsoever a man sows that shall he also reap. —Field and Farm.

It is reported by several responsible farmers that the chance for a large tobacco crop in this county has been cut short from the fact that some kind of fly or cut worm, has gotten into the plant beds under the canvass and eaten all the plants, not leaving a single one. This is reported to be the case between New Castle and Turners and between New Castle and Drennon Springs. —Eminence Constitutionalist.

Carefully consolidated reports from American agriculturists' corps of observers made May 1 show the condition of winter wheat to be 91.5 against 95.5 last months and compared with an average at this date for five years of 84. April was wholly favorable for the development of the wheat crop over the greater part of the belt. The report shows little damage through insect pests outside of Texas, Oklahoma and Michigan. No crop in twenty years has stood better than the present one in all important features of roots and stools. The condition May

1 of wheat by States include Ohio 88, Kentucky 85, Michigan 83, New York, Pennsylvania and Indiana 95, Illinois 96, Kansas 100, California 90.

Judge H. B. Watts, a Hereford breeder of Fayette, Mo., has a pure-bred Hereford cow whose record as a prolific breeder is probably unequalled. She dropped her first calf a few days after she was three years old, and in the next five years and eight months dropped eight more, making a total of nine by the time she was eight years and eight months old. Her best year was 1899, for in January she gave birth to one calf and had three more in December. Her owner has realized \$2,150 from the sale of her products, and still retains her last calf. The triplets referred to above attracted much attention at the Hereford show sale at Kansas City last fall and sold at auction for \$200, \$210 and \$225 respectively.

SUPREME IN ITS BEAUTY

PAN-AMERICAN EXPOSITION TO BE A MAGNIFICENT SURPRISE.

Birdseye View of the Great Group of Splendid Architectural Works—A Wonderful Setting of Fountains, Pools, Plants and Flowers.

It is promised for the Pan-American Exposition that it will surpass in beauty any previous exposition in the world's history. It is also expected that it will outlive its predecessors in many other ways, for at no time have such wondrous achievements in all arts, such perfection in the hundreds of trades, been attained. But the purpose of this article is to treat, in a general way, of the plan of the Exposition, the symmetry of arrangement and the exterior beauty that represents the careful expenditure of several millions of dollars. Accompanying this article is a birdseye view of the Exposition plot, showing the magnificent work in its complete state. The view is from the south and shows an area one mile and a quarter long and half a mile wide, there being 350 acres in the inclosure. In the immediate foreground is a portion of Delaware Park, one of the famous beauty spots of Buffalo. The view shows the Park Lake, with the North Bay at the left, and in the left foreground, south of the bay, may be seen a portion of the Albright Gallery of Art, a beautiful permanent building of white marble, the gift of John J. Albright of Buffalo, and costing over \$400,000. North of the Bay is the New York State Building, also a permanent structure of marble. These two buildings are in the style of Greek temples, one containing reminders of the Parthenon and the other resembling somewhat the Erechtheum upon the Acropolis at Athens.

Between the North Bay and the Lake the City of Buffalo has built at large expense a new and beautiful bridge of heavy masonry, known as the Bridge of the Three Americas. This bridge carries the broad thoroughfare which leads from the main southern entrance to the approaches of the Exposition, as seen in the foreground just north of the Lake. On the northern shore of the Lake, situated the life saving station erected by the Federal Government where daily exhibitions will be given by a crew of ten men showing the uses of modern life saving apparatus as employed upon our coasts. Hidden from view, upon the southern bank of the Lake, a beautiful casino and boathouse has also been built by the City of Buffalo for Exposition uses.

The symmetrical grouping of buildings will be at once noted by the observer. Beginning at the formal approach, just north of the Lake, the eye falling northward between two rows of ornamental columns to what is known as the Forecourt. East of this are the State and Foreign buildings, forming in themselves a very interesting feature of the Exposition. Near these also are the buildings for the special ordnance displays representing the products of several hundred manufacturers in this line of work. West of the Forecourt will be the outdoor horticultural displays and the Women's building. We cross now the Triumphant Bridge, which will be remarkable for its tall piers, richly ornamented with statuary, the product of the genius of Karl Bitter, the director of sculpture, and other famous sculptors. On either side are the Mirror Lakes which form a part of the Grand Canal, more than a mile in length, which surrounds the main group of buildings.

We come next to the Esplanade, which is nearly two-fifths of a mile long and 450 feet wide. The western end of the Esplanade is inclosed by Horticulture, Graphic Arts and Mines buildings. The eastern end is shut in by the Government group of three large buildings. Sunken gardens with elaborate fountains and many groups of sculpture occupy the two arms of the Esplanade, and the decorative features throughout this broad space are very numerous and beautiful. North of the Esplanade is the Court of Fountains, with the Ethnology building on the right and the Music building on the left. Two subordinate courts also open into the Esplanade from the north, the one on the right being known as the Court of Cypress and the one on the left as the Court of Lilies. Next, north of the Ethnology building on the right and fronting upon the Court of Fountains, is the Manufactures and Liberal Arts building and on the opposite side the Machinery and Transportation building. In the Court of Fountains is a large pool, having an area of about two acres and contain-

ing many beautiful fountains. Proceeding again northward we come to the Mall, a broad avenue, half a mile long, extending from the eastern boundary to the western gate of the Exposition. Fronting upon the Mall on the right is the Agriculture building and on the left the Electricity building. We now arrive at the most conspicuous feature of the Exposition, the massive Electric Tower, 391 feet in height. This tower stands between the Court of Fountains and the Plaza, in a broad pool, about two acres in extent. This will be the most ornamental feature of the great Exposition and will be the centerpiece for special and elaborate electrical illumination. Immediately north of the Electric Tower is the Plaza, with its beautiful sunken garden and bandstand in the center, the Propylaea or monumental entrances at the north, the entrance to the Stadium on the east and the entrance to the Midway on the west.

It should be understood by every intending visitor that the Exposition will present the most beautiful spectacle that twentieth century genius can provide. By day there will be a most pleasing display of floral and fountain effects. The many buildings, with their elaborate and delicate tracery of ornamental plastic work and their radiance of color, the many groups of statuary in every part of the grounds, will constitute a picture never before paralleled. At night all the buildings will glow with the soft radiance of thousands of electric lights, making a scene of unrivaled brilliance and splendor. Half a million lamps will be used in the electrical illumination.

It should also be added that the Midway at the Exposition will be the most extensive and novel that has ever been prepared. It will be 3,000 feet long, having more than a mile of frontage. Over 20 very interesting features, many of them covering several acres, will make up this gigantic collection of wonders.

The athletic features of the Exposition will be shown in the Stadium, which covers about ten acres of ground and contains a seating capacity for more than 12,000 people. All of the exhibit buildings will be filled to completion with the very latest products of Pan-American genius and industry and will offer an opportunity for every inquiring mind to learn a most interesting lesson of New World progress and civilization.

The power for Exposition uses is furnished principally from Niagara Falls, which are situated only a few minutes ride from the Exposition grounds. Buffalo is a city of nearly 400,000 population and is preparing in every possible way for the reception of millions of visitors in 1901. MARK BENNETT.
